Monefy Mobile App

Testing Plan

Prepared by: Muhammad Atef
Prepared for: InstaBug company

Version: 0.1

Creation Date: [8/2/2022]

Table of Contents

Objectives

Writing test strategy for "Monefy" mobile application IOS to InstaBug Company.

Scope

1- Write down testing strategy.

2- Write down all the testing scenarios.

3- Test mobile application and write down its bugs.

Test Deliverables

1- Testing strategy in word document.

2- Testing scenarios in excel sheet.

3- Bug Report in excel sheet.

Testing Schedule

There are two day in the first day I apply exploratory testing on "Monefy" mobile application and write test desgin. At the second day I prepare my work products and they are (test strategy, high level test scenarios, bug report).

Test Scope

-In Scope: Functional Testing and front end Testing.
-Out of Scope: Performance testing, Automated Regression, all forms of Non- Functional, Accessibility Compliance Testing, Security Testing, and User Documentation Review.

Risk Analysis

When I start testing I want to start with the high-priority items, then test medium-priority and if time permits, I will test low-priority functionality.

Test Environment

I need a good IPhone mobile for IOS application with stable internet connection.

Test Tools

I use Microsoft Excel Worksheet to write test scenarios and bug report. And Microsoft word Document to write test strategy and test scenarios.

Roles and Responsibilities

I was assigned to do all the testing activities related to "QC_Technical_Task_-_Model_A_-_0_to_2_years".
